

# Smyth County Schools Revolving Door Program

Dear Parents,

Smyth County School System offers an Enrichment Resource Pull-Out Program. This program consists of four units of study, which focus on the core content areas of Math, Language Arts, Science, and Social Studies. Units are designed to provide students with academic challenges, as well as opportunities for them to express ideas and knowledge creatively through multiple avenues.

There are two ways for students to be eligible for participation in the unit. A student is eligible for participation if:

- \* He or she is identified as gifted in the targeted content area.
- \* He or she is recommended by a classroom teacher and meets the required criteria.

Teachers recommend students based on their classroom grades, SOL scores, and the ability to function independently at an accelerated pace. Recommendations are reviewed and students meeting the criteria for participation will be notified by their classroom teacher.

By signing the permission statement below, you are giving your child permission to participate in the program unit(s) for which he or she may qualify. If you have questions, please contact me at your child's school or by e-mail.
